

MOBILE LOCATION CONFIRMATION

WHAT IS IT?

Wherever you are in the world, Visa wants your payment transactions to be as convenient, secure, and smart as possible. Visa's new technology enhances convenience and security by eliminating the need to notify your bank with travel plans. This means fewer legitimate transactions declined while traveling!

HOW IT WORKS

Mobile Location Confirmation is an opt-in service available through your card issuer's mobile banking app. It uses mobile geo-location data to match the location of Visa transactions with the location of your mobile device. During the payment authorization process, if your mobile device is in proximity of the payment transaction, your issuer can more confidently approve the transaction.

OPT IN

Opt out at any time

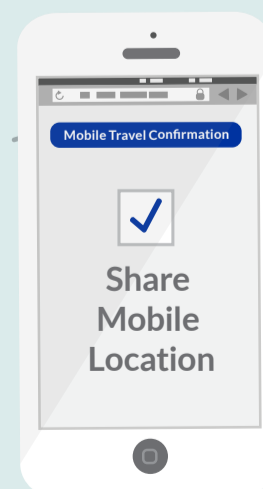

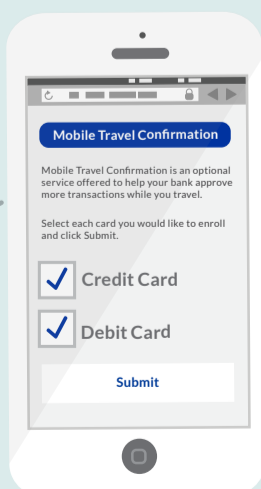

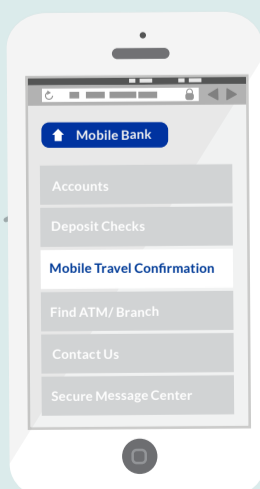

Download your bank's mobile app and accept Terms & Conditions.

Select the cards you would like to enroll and click Submit.

Click OK to share your location and travel with confidence and convenience!

Mobile Location Confirmation

Visa's fraud protection is designed to give you confidence in using your account everywhere you shop – in store, online, or on a mobile device. Learn more about Visa's multiple layers of security at www.Visa.com/SecurityMediaKit, or follow us at twitter.com/VisaSecurity.
