DPS Forward

Your ticket to modernization

Today's society expects more

The payments landscape has changed for the better.

New innovations have filled the market, and consumers are taking an active interest. The consequence of this is that expectations have risen, with fast, seamless, and secure payment experiences becoming table stakes, each and every time.

For issuers, satisfying these needs is easier said than done.

Keeping up is hard – the hottest new trend is just around the corner, making it hard to know where to turn. Issuers risk being left behind and losing relevancy with consumers.

Modernization is the answer

Fortunately, emerging new technology is transforming the ways in which financial data is exchanged.

Technology that unlocks:

- ✓ An API based platform
- ✓ Cloud based enterprise
- ✓ Fast time to market

Introducing *DPS Forward*

A scalable, modular, and lightweight issuer processing platform, empowering you to innovate and deliver on today's expectations:

- ✓ Card issuing (digital/physical)
- ✓ Authorization processing
- ✓ Network connectivity
- ✓ Plus value-added services

Partner with Visa DPS, and unlock the door to a suite of services to further enhance your proposition.

We enable digital-first payment innovations for your consumers, as well as a robust platform to analyze and report on your portfolio performance.

47bn annual authorization transactions³
+190m active cards supported⁴
60% of tokenized Visa U.S. debit transactions⁵

More than your issuer processor

We are your payments partner.

Reliable, robust and agile, proven at a global scale. Our investment in modern technologies enables issuers to deliver on market change and increasing demands.
