Fleet product merchants that fall within fleet merchant category codes (MCCs) need to take action to update their point of sale with the BINs listed above to enable the recognition of fleet-enabled products, which may have cardholder prompting instructions or service restrictions. There is no change to the fleet merchant requirement to support fleet functionality, including enhanced data.

Merchants that fall within the fleet MCCs include:

Visa Fleet Program

The Visa Fleet program complements Visa’s commercial product suite. Whether utilized as an added capability to the Visa Commercial card product or as a stand-alone card product, Visa Fleet is used by private and public sector organizations to manage vehicle-related expenses.

Numerics Initiative Impact to Fleet Cards

The Numerics Initiative is Visa's approach to support the industry change to extend the length of the issuing BIN standard. Given that Visa Fleet has specific requirements for identification at the point of sale, Visa will provide specific guidance on impacts for this program in an upcoming edition of the *Visa Business News*. For questions on the Numerics Initiative, clients are encouraged to visit the [Numerics Initiative](#) page at Visa Online and to reach out to their Visa representative.
