Bringing Secure Payments to the Internet of Things

Andrew Keighery | Vice President | Visa Inc.
Jonathan Vaux | Executive Director | Visa Europe
By 2020 there will be more than 50 billion devices connected to the Internet

Visa will help bring secure payment functionality to the Internet Of Things, beginning with wearables and cars.
Introducing the Visa Ready Program for IoT

Visa Token Service
- Replaces card account number with a token
- Token is domain restricted
- Access to Visa issuers

Visa Ready
- Secure tokenized payments
- Streamlined certification process
- Speed to market
Visa Ready Strategic Partners will play a key role in bringing IoT payment solutions to market.

Visa Ready strategic partners will offer manufacturers:

- Streamlined integration to the Visa Token Service
- Access to participating VDEP issuers
- Visa certified payment reference designs
- Guidance on Visa Ready certification for devices
Tokenization has allowed Visa to offer payment-enabled mobile device experiences.
Visa’s is extending tokenization connected devices through to its trusted channel partners
Device manufacturers get access to the following through the Visa Ready Program for IoT:

- Payment Expertise
- Technical Integration
- Streamlined Certification
- Speed to Market
In 2016, Visa will enable wearables for tokenized payments
Visa will bring payments to various connected car experiences
Visa is partnering with the following companies to light up the ecosystem

Visa Ready Strategic Partners

IoT Payment Experiences
Visit the wearables wall and connected car in our booth.
